Genius School x ProEd Global School

The Future of Learning

Inspiring a new generation of creative, conscious, and entrepreneurial learners.

genius

Creating the World's Leading Future School

Designed for the Genius Generation

Around the world, education is being re-imagined. Yet the greatest breakthroughs are happening not only in technology, but in how we prepare our children to think, feel, and lead.

Genius Group is the world's leading entrepreneur education group, preparing communities for the future world of work. We are proud to be the new majority owner of ProEd Global School in partnership with Nuanu Creative City, and we look forward to working with ProEd Global School's thriving teacher, parent and student community to create the World's Leading Future School here in Bali.

What is a Future School?

It is a school which ignites every child's unique genius, making their school years a fun, personalized, student led adventure, while preparing them for a future world where they can confidently pursue their life's work.

As Founding Chairman of Green School, Bali, I led the team responsible for growing Green School to become the #1 Future School in the World Economic Forum's White Paper: 'Schools of the Future'. In the White Paper, the WEF identified eight Future Skills necessary for our children to thrive in the future:

1. Global citizenship skills
2. Innovation and creative skills
3. Technology, AI, Web3 skills
4. Interpersonal, leadership skills
5. Personalized, self-paced learning
6. Accessible, inclusive learning
7. Problem based, project-based
8. Lifelong, student-driven learning

Since the White Paper was published, Future Schools have launched throughout the world, embracing these eight Future Skills. There has never been a more important time to re-imagine education for our children.

We believe that the combination of Genius School and ProEd Global School, the introduction of our Genius Camps and future plans now give us a unique opportunity to create the World's Leading Future School.

We invite you to join us on the journey.

Roger James Hamilton
CEO, Genius Group

Our Shared Vision

Partnership On Purpose

"Education is the most powerful weapon which you can use to change the world"
– Nelson Mandela

Our vision for our Future School is a lifelong learning journey that equip global citizens with the Future Skills they need to succeed in a fast changing future. This includes three core principles:

1. Ignite Your Genius

As robots become better robots, the purpose of learning is for humans to become better humans. The heart of personalized learning begins with each child (and adult) learning their own unique talents, passions, purpose and dreams, and then to design their personal learning journeys aligned to their unique genius. Genius School will introduce its AI enhanced toolkits for self-awareness, self-mastery and self-expression at ProEd through its weekend Genius Camps, to which all teachers, parents and students are invited.

2. The Future ABCs

Mastery of the Future ABCs is important for children and adults to be prepared for the future: Artificial Intelligence (AI) is a foundation to our future digital workforce. Blockchain (Web3) is a foundation to our future digital economy. Community is a foundation to our human future. Genius School will introduce Genius Camps at ProEd on school holidays on the Future ABCs for both children and adults.

3. Your Life's Work

Academic excellence will be a focus of our Future School alongside mastering Future Skills. ProEd Global School will extend from offering Cambridge accreditation to offering dual Cambridge and International Baccalaureate (IB) accreditation. Genius is also building a new High School at Nuanu with cutting edge tech, AI, VR, robotics, science and maker labs, together with music, art, design and creative studios. The goal of our Future School is not for students to 'get a job' and wake to their day's work, but to 'create their ideal life' and wake every day to their life's work.

We have a three year plan to evolve from the current strengths of ProEd Global School of care, community and curriculum, whilst we add Genius School programs through an extra-curriculum calendar of camps, courses and community events. During this three year plan, we will build and launch new facilities including our Genius City Learning Hub at Nuanu and Genius High.

OUR GENIUS CITY
LEARNING MODEL

Uniting Nurture and Nature

The integration of Genius School with ProEd Global School is part of a larger vision – a partnership of Genius Group with Nuanu Creative City to launch Genius City, a city of the future designed around the Bali philosophy of Tri Hita Karana or 'three causes of happiness'.

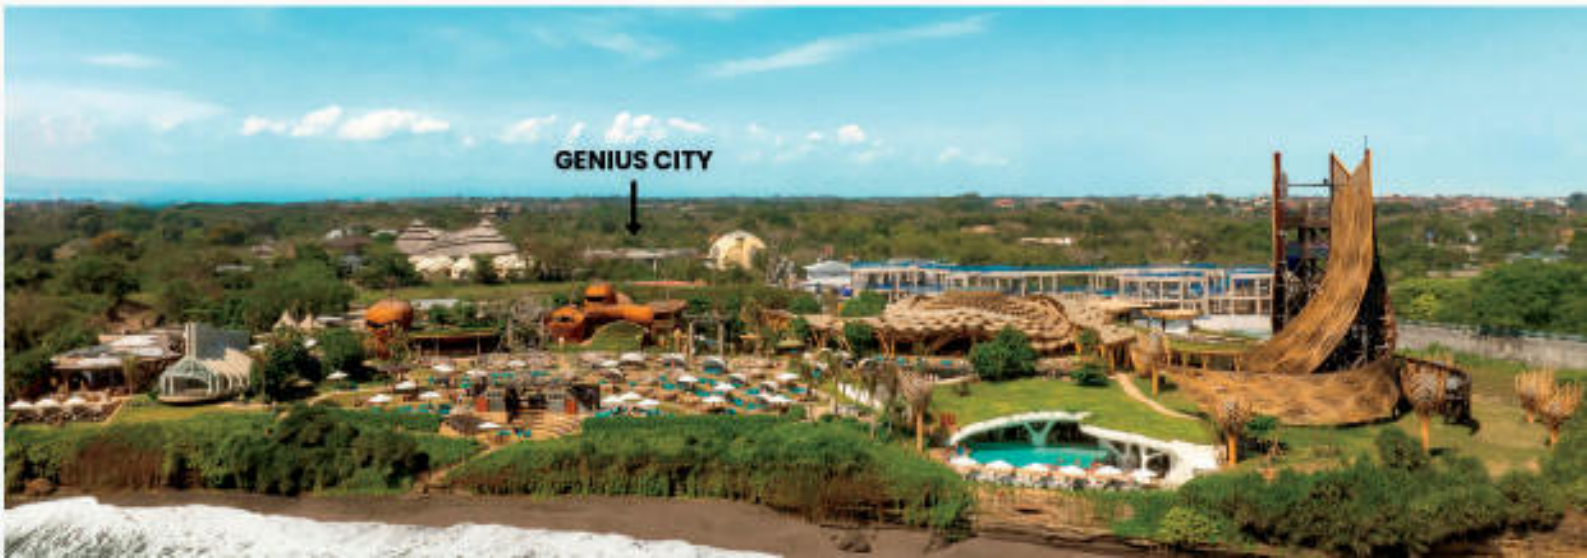

This unity with spirit, people and nature is a lifelong learning journey which sits at the heart of Bali's communities. Children live and learn within the day-to-day activities of the village.

Alongside the Student Hub and Learning Hub at Genius City is a Living Hub for adult learners and mentors to collaborate with older students. Students will have an opportunity to learn from world leading thought leaders and educators.

Genius School will be hosting an annual calendar of events at Genius City including Asia's leading Youth Summit, Genius Camps, Genius Educator Certifications, Entrepreneur Camps and participation in global Robotics and Coding competitions.

Middle School and High School students will have the opportunity to join the Genius Apprentice Program, gaining experience and credits working together with participating enterprises and presenting their learning journeys in our annual Genius Awards. Our Genius AI app will matchmake students with ideal mentors and opportunities based on their ambitions, talents, passions, and purpose, giving them the opportunity to learn and earn with GEMs, our Student Credit System.

These unique features of our Future School will be integrated into both our ProEd Nuanu and Umalas campuses. While most schools have a playground within, Genius School is a school within a playground – with a thriving community to support our next generation.

YEAR ONE: 2026

BUILDING THE FOUNDATION FOR THE FUTURE

In 2026, we begin our journey to create the World's Leading Future School. Our plan is designed for our parents and students at both Nuanu and Umalas campuses to begin to experience improvements through our Genius Camps calendar, while the current ProEd care, community and curriculum remain the same.

Throughout the year, we will work together with our teachers, staff and community to co-create the future, as we begin the build of Genius City and our Genius High School.

MILESTONES FOR 2026

Launch of Genius Hubs:

A dedicated space at both Nuanu and Umalas where parents and students can ignite their genius, with a dedicated Genius Guide to guide you through discovering your talents, passions and purpose, together with sharing the Genius School and Genius City vision, seeing the latest progress on plans, registering for Genius camps, courses and certifications, joining the Genius community and Genius AI app.

Genius Calendar:

Launch of calendar of events in sync with the ProEd school calendar, with options to join Genius Camps, the Asia Youth Summit, ABC Labs, Genius Educator Certification, Entrepreneur Camps, Robotics and Coding courses and competitions, Genius Apprentice Program.

Genius AI App:

Introduction of Genius AI App, providing participating teachers, parents and students with their own personalized Genius Mentors, enabling students to design their Genius Journeys, connect with mentors, students and opportunities to collaborate on projects and journeys, learn and earn Future Skills in a fun, engaging way.

Genius High School:

Launch High School program at Nuanu Campus with Genius Apprentice Program. Begin build of Genius City and Genius High with Student Hub, Learning Hub and Living Hub. Begin pre-enrolments for Genius High launch scheduled for August 2027.

Nuanu & Umalas Campus:

Maintain the high level of care, community and curriculum currently being provided at Nuanu and Umalas campuses. Begin the process for IB accreditation. Provide Genius Educator Certification and teacher training for all teachers and participating mentors throughout the year.

YEAR TWO: 2027

LAUNCHING THE WORLD'S LEADING FUTURE SCHOOL

In 2027, our goal is to launch Genius High by August 2027 as a part of Genius School and Genius City, designed and built as the World's Leading Future School. Both our Nuanu and Umalas campuses will offer Early Learning, Primary and Middle School education, whilst the High School will be provided within the integrated student hub, learning hub and living hub in Genius City.

MILESTONES FOR 2027

Launch of Student Hub:

The student hub is being designed by Bali-based, award-winning architects, Inspiral, as home to Genius High. With world class, iconic, bioarchitecture design, the student hub will feel more like a creative, high tech, entrepreneurial hub for young adults than a school.
It will include:

- Student Youth Club with games room, quiet room, lounge, garden
- Student Café with kitchen and library
- Teacher Collaboration room and staff lounge
- Dedicated prep pods for students to meet, study and connect
- Student Showcase gallery for presentations and awards
- Genius Hub as central point for students to ignite their genius

Launch of Learning Hub:

The Learning Hub will feature state-of-the-art facilities to develop Future Skills in both students and adults. These will be based at Genius City but accessible to students of all ages. When facilities are not being used by students, adults can go 'back-to-school' via Genius Camps and retreats to reskill for the future. Facilities include:

- Wet science and bio lab
- Dry science and physics lab
- Maker lab with 3D printing, robotics, AI, electronics
- Music room and recording studio
- Film, media, animation, podcast and broadcast studio
- Virtual reality and 3D immersion studio
- Classrooms, workshops and theatre space.

Launch of Living Hub:

Alongside the Learning Hub, Genius City will feature a 100 room Living Hub for workshops, conferences, retreats, and will feature a series of cafes and restaurants, shops, leisure facilities, rooftop pool, four storey, solar-powered waterfall, Eden Project inspired biospheres and workshop and connection to all parts of Nuanu Creative City.

Nuanu & Umalas Campus:

Genius Camps and classes will extend to all ages in both campuses, with both campuses renamed as Genius School by the end of 2027. The Genius Hubs at both campuses will grow in size to provide all students with personalized learning journeys throughout the year. The IB accreditation process will be in the second of three years.

YEAR THREE: 2028

IB AND CAMBRIDGE ACCREDITED FUTURE SCHOOL

In 2028, we believe we will be world renowned as the World's Leading Future School, with IB and Cambridge Accreditation, pathways to the World's leading universities and enterprises around the world, attracting the leading thought leaders and educators to Bali, where they will inspire our students to become tomorrow's leaders and creators.

MILESTONES FOR 2028

A Model for the Future:

We are in a unique position to create a human-first future here in Bali, through the combination of Genius, ProEd and Nuanu. Our goal is for this to be of service directly to our children, and to also serve as model for Future Schools around the world, much as Green School, Bali served as a model for other Green Schools around the world.

A School within a Playground:

Nuanu is developing world-class facilities which serve as a playground for students and educators. This includes cultural and art museums, nature experiences, sports and fitness facilities, entrepreneur hubs, creative hubs and a calendar of festivals, summits and programs. Most will be completed and active by 2028, integrating into our Genius City calendar for the benefit of students and families.

Genius Calendar and AI App:

We anticipate that by 2028, we will have over a million users of our AI App, connecting with mentors, projects and opportunities linked to their talents, passions and purpose around the World. We believe there will be high demand to experience Genius School and Genius City in person, and our students will be in high demand for their Future Skills and experience.

Accreditation and Recognition:

Our goal is to have both IB and Cambridge accreditation by 2028, as well as having partnerships with Future Schools globally, including Alpha School, Khan Academy, Learnlife and ID Tech. By being recognized globally as a destination Future School, we see our Bali school being the first of many Genius Cities and Genius Schools around the world. Our mission is to ignite the genius of our children, and in turn ignite the genius of the world.

"Everybody is a genius. But if you judge a fish by its ability to climb a tree, it will live its whole life believing that it is stupid."

Ignite Your Genius
