Genius School
ProEd Global School

Nuanu Campus 2026

Creating the World's Leading Future School

Designed for the Genius Generation

Most schools teach every child the same way. They deliver the same lesson, at the same pace, to a room full of entirely different minds, and then wonder why some students thrive while others drift.

ProEd Global School - now a Genius School - is built on a different belief: that when a child learns in alignment with their natural strengths, they light up and learning becomes a joy.

Our mission is to ensure a vibrant school environment which ignites every child's unique genius, making their school years a fun, personalised, student-led adventure, while preparing them for a future world where they can confidently pursue their life's work.

Our Nuanu Campus - Home to the Future of Learning

Our School Campus is located in the heart of Nuanu Creative City, in a community and living ecosystem that becomes an extension of the classroom every single day.

In 2026 we are expanding at ProEd Global School in Nuanu our Genius Future School campus, courses, camps and community to serve our ever-growing number of students and families. We're excited to share with you our plans to expand and enhance our education offering.

What your child will experience

- Cambridge-certified academics — rigorous and globally recognised
- The full pathway from Early Years through to A Levels
- IB accreditation in development — dual qualifications by 2028
- Learning shaped around each child's natural strengths
- A Genius Guide — a dedicated mentor, not just a teacher
- AI-assisted learning tools built around your child's progress

Join us on our journey towards creating the World's Leading Future School. When we ignite our genius, the future looks bright!

"Talent perceives differences, genius unity."
- W. B. Yeats

Academic Excellence

Strong Foundations for Future-Ready Learners

ProEd Nuanu follows the Cambridge International Curriculum, one of the most rigorous and respected frameworks in the world, recognised by leading universities around the world.

Strong foundations are what give every child the freedom to build something great. That is why we follow the Cambridge curriculum: One of the most rigorous frameworks in the world, recognised by leading universities across the UK, US, Australia, Europe and Asia.

We also know that academic excellence alone is not enough. The world your child is growing into will reward people who know who they are, how they think, and how to create and contribute. That is why we also nurture interpersonal, leadership and future skills.

Working Towards IB Accreditation

Over the next three years, we are pursuing full International Baccalaureate accreditation alongside Cambridge. IB opens additional university pathways - particularly in the US and Europe - and by 2028, families will have access to dual Cambridge and IB qualifications.
One School. Two globally respected pathways.

CAMBRIDGE International Education
Cambridge International School
ASDAN
edexcel
Pearson BTEC

Primary	IGCSE	A Levels
• Strong literacy & numeracy • Critical thinking • Project-based learning	• Deep subject mastery • International qualifications • Personalised subject pathways	• Advanced specialisation • University-ready graduates • Global pathways

We do not replace academic rigour. We elevate it.

The School of the Future

Tailored to Your Child's Genius

Your child is not like every other child.

Warren Buffett did not build his wealth by thinking like Steve Jobs. Oprah did not build her influence by thinking like Jeff Bezos. Every genius has a natural path — and the fastest way to extraordinary results is to find yours.

The same is true for your child. Traditional education was designed to produce the same output from every input. We are building towards something different: a model where every student's learning journey is shaped around how they actually think, progress and grow — layered on top of our Cambridge curriculum, not instead of it.

AI-Assisted Learning

AI tools will map each student's understanding across every subject: identifying where they are, what's holding them back, and what they're ready to master next. Precision teaching, not guesswork.

Personal Learning Plans

Every student will receive a living weekly plan and playbook, not a generic timetable and textbooks. A playbook and journal that evolves with them, week by week, as they grow, allowing you to share in their journey.

The Genius Guide

Alongside every classroom teacher, each student will have a dedicated Genius Guide — a mentor who tracks their growth, knows their learning profile, and helps them develop the most important skill of all: the ability to direct their own learning.

Mastery-Based Learning

Our model is rooted in genuine understanding, not surface performance. The goal is never to teach to the test, but to build deep comprehension that makes the test simple, and that stays with your child long after the exam is over.

When a child learns in flow, everything becomes easier.

A School Within a Playground

In the Heart of Bali's Creative City

Most schools prepare children for the world. We believe children should learn immersed in it. Our campus is integrating fully with the projects, activities and community within Nuanu Creative City: A living, growing ecosystem where students don't just study sustainability, entrepreneurship and global challenges. They take part, learning through doing.

Genius Missions

Real-world projects that connect learning to contribution

- Ocean & Sustainability Projects: Students take action on real environmental challenges in Bali
- Community Action Projects: Building empathy, leadership and problem-solving skills through lived experience
- Global Genius Network: Connecting your child with peers and projects across the world

Nuanu Learning Partners

Integrating an ecosystem of living, breathing learning

- Butterfly Farm: Ecology and nature in a living environment
- Alpaca Lodge: Animal care, responsibility and community
- Entrepreneur Hubs: Real business and maker spaces
- Cultural & Art Spaces: Crafts and creative expression

Genius Apprentice Programme

Providing a bridge to entrepreneurial and future work skills

Middle School students work alongside real enterprises, gaining experience, earning credits and presenting their journeys at the annual Genius Awards.

Your child will not just learn about the world. They will learn how to change it.

A World Class Campus

Designed to nurture hearts and minds

This year, we are taking a major step forward: new facilities, world-class AI partnerships, and a deliberate evolution of our learning spaces, all guided by one question. What does the best possible environment look like for every child?

Introducing Learning Studios

We are evolving our classrooms into purposefully designed Learning Studios more intimate, structured environments where students work in focused groups of four. Teachers move between groups, providing targeted support. Every child is seen. Every child is engaged. No one drifts.

Our learning studio design is based on the latest learning science that has proven more personalised, intimate guidance outperforms standard class teaching. After optimizing our building design, our Learning Studios remain larger than international classroom standards. What changes is not the space — but how powerfully it is used.

Interactive student learning groups	Purposefully designed spaces	Larger than international standards
Everyone participates. Teachers support each learner closely. No child is overlooked or able to disengage.	Group learning areas, breakout zones and open teaching spaces: designed for how children interact and engage.	After optimisation, our Learning Studio designs are intimate yet remain significantly larger than international benchmarks.

Learning is natural when the learning space is alive.

Leading Edge Technology

Harnessing science to enhance our learning

Our AI-Powered Space Capsule

In 2026 we are introducing a world first: A satellite-connected, AI-powered, immersive classroom that enables students to time travel to the dinosaurs or space travel to mars.

The space adapts in real time to each student, adjusting difficulty and guidance based on their responses, and giving the opportunity to travel through history or any subject, to learn from historic figures on concepts and events first-hand.

New Science Labs

State-of-the-art wet and dry science labs are being added to our Nuanu campus, equipped for the full Cambridge sciences curriculum and built to High School standard. With our new facilities, we believe we will be the best equipped school in Bali to prepare our students for the future.

World-Class AI Campus Partnerships

We are proud to be exploring what AI means for education alongside pioneers like Google, OpenAI and Anthropic, whose tools are already beginning to transform the way teachers plan, create and connect with students.

From Apple's hands-on device programmes to Microsoft's Elevate for Educators, which brings free AI training and professional credentials to our teachers, we are investing in our people: In our teachers, who deserve the best professional development available. In our students, who deserve to graduate ready for a future world they will help to create.

The best way to predict the future is to create it.

It Takes a Village

A SCHOOL FOR YOUR WHOLE FAMILY

Children thrive when they see adults learning alongside them. At ProEd Global School and Genius School, parents are not passengers, they are partners.

PLANS FOR 2026

Parent Community Club	Swimming Pool
A space on our Nuanu campus that belongs to the whole family. Work, connect, learn alongside your children, and help shape the school community you want them to grow up in. • Parent work and meeting space • School programme participation • Community events and Genius Talks	We are applying to Nuanu to add a pool to connect our Community Club and School — for students, families and the wider community. Sport, wellbeing and connection, right on campus. • Student swimming and water sport • Open to families and the community • Wellbeing and connection on campus

Genius Academy for Families
Workshops, conversations and events on relationships, health and life skills for parents who want to understand the world their children are growing into — and how to support their genius at home.

Genius Educator Certification
Free for every ProEd family. The tools, language and insight to support your child's future-focused learning beyond the classroom — because the best education doesn't stop at the school gate.

Genius Talks & Festivals
Thinkers, makers, entrepreneurs and leaders in conversation — close to home. From Samana to Future Summits, our events are community events in the fullest sense.

The Global Genius Network
Your child's education connects them to a global movement of entrepreneurs, educators and changemakers building a better world. The right people, at the right time.

If you want to go fast, go alone. If you want to go far, go together.

Introducing Genius Cafe

Nourishing food, personalised to every diet

We are bringing Genius Café to our campus, as a complementary addition to Jungle Toppings. Together, these two vendors will offer complementary menus side by side, giving our families choice in how they nourish and connect throughout the school day. More than just a place to eat, this expanded café space will be a natural gathering point for students, parents and the wider community: a space to slow down, connect, and feel at home.

We are expanding the café seating area to create a more generous, comfortable environment that brings both vendors together: two menus, one great space.

What food is to the body, learning is to the human spirit.

A Step Towards Genius City

2026 is Year One towards our lifelong learning campus

By 2027, a new world-class High School will open in Nuanu City, purpose-designed as the World's Leading Future School

Located near our current school campus, Genius City combines our new high school, a retreat for adults to learn and a world-class learning hub that connects them together, Genius City is scheduled for launch in phases beginning at the end of 2027.

This is what school can become. And your child can be part of building it.

The Journey Ahead

2026	**Flow begins now**	AI Learning Pod opens. New science labs. World-class AI campus partnerships activated. Community Hub takes shape. Learning Studios launched.
2027	**Genius High launches**	Genius High launches in Nuanu City. Cambridge A-Levels. Science labs, maker lab, media studio, VR studio. IB accreditation year two.
2028	**Global recognition**	Full IB and Cambridge dual accreditation. Partnerships with Alpha School, Khan Academy, Learnlife, ID Tech. The World's Leading Future School.

We are born to be architects of our future.

ProEd Global School

GENIUS SCHOOL SCHOLARSHIP

If you could learn Future Skills (like AI, Robotics & Entrepreneurship), what impact would you want to make in the world?

One Full Scholarship
100% of Annual Tuition

WIN

20 Part Scholarships
25% off Annual Tuition

Who Can Enter

The Genius School Scholarship is open to students aged 7 to 18 from any country, with no prior connection to ProEd or Bali required. It is also open to current students of ProEd. Entry is welcome to all. We are not looking for the most polished presentation — we are looking for the best ideas by answering the question above!

Submit your entry

A 60-second video and short written pirce answering the question above. Upload your video and entry at proedschool.com. One evening's work!

Share your challenge

Once submitted, your entry is judged by our panel of students, teachers and parents. The strongest entries are the ones that start conversations.

Finalist conversation

The shortlist of top applicants will be invited to a short conversation with our team. All entries will be notified of the results and awards.

SCHOLARSHIP AWARDS:

Challenge Winner:
One Full Scholarship
100% of annual tuition

Selected Finalists:
20 Part Scholarships
25% off annual tuition

** awards are made at the discretion of the selection panel and are not guaranteed for all entries.**

All entrants receive a personal response.

CAMBRIDGE ASDAN edexcel BTEC

FIND YOUR CHILD'S NATURAL PATH

The future belongs to the builders.

Enter the challenge at proedschool.com • Places are selective.

genius

ProEd Global School

GENIUS BALI SCHOLARSHIP

Ten full scholarships for the children of Bali.

100% of annual tuition awarded across both campuses

WIN

Six primary places
Four middle school places

SCHOLARSHIP AWARDS:

Challenge Winners:
10 Full scholarships
100% of annual tuition

Primary: 6 scholarships
Nursery through Year 6, across both Nuanu and Umalas campuses.

Middle School: 4 scholarships
Years 7 to 9, across both Nuanu and Umalas campuses.

All entrants receive a personal response.

CAMBRIDGE ASDAN edexcel BTEC

Reach out

Contact us at hello@geniusschool.ai or visit proedschool.com. Applications can come directly from families or through a community member who knows your child.

Share your story

A short written application from the family and a brief statement from someone in the community. We want to understand who your child is.

We come to you

Our team will be in touch within two weeks. Every family who applies receives a personal response.

Selected applicants may receive scholarships of up to 100%. Scholarship awards are made at the discretion of the selection panel and are not guaranteed for all emails.

Who Can Enter

This scholarship is for local Balinese children from families who could not otherwise access a Cambridge international education. Both campuses are participating.

There is no academic entrance test. We are looking for children who are curious, engaged, and ready to grow. Families and community members are both welcome to apply.

BALINESE SCHOLARS ENRICH EVERY CLASSROOM THEY JOIN

A community. A culture. A place to build something that matters.

To apply or nominate a child: hello@geniusschool.ai

ProEd Global School

GENIUS NUANU SCHOLARSHIP

Full Scholarship
100% of Annual Tuition

WIN

10 Part Scholarships
25% off Annual Tuition

Who Can Enter

This scholarship is for families who have purchased or are purchasing a home in Nuanu Creative City. It is ProEd's way of honouring the families who have chosen to build their lives here — and of making sure their children's education is part of that decision from day one. The scholarship is open to students from Early Years through to Year 11. To qualify, simply enter the Genius School Scholarship and check the box that you are a Nuanu home owner.

Visit the school

Book a campus tour at proedschool.com. Come and see the learning environment your child could grow up in. When you see it, you will understand.

Submit your application

Enter our Genius School Scholarship award, and chec the box that you are a Nuanu home owner. You will then be automatically entered in both Scholarships.

Share your story

Speak to our team. We would love you to share your story of making Nuanu City, Genius School and ProEd School your family home.
